

DRAW YOUR OWN NARWHAL!

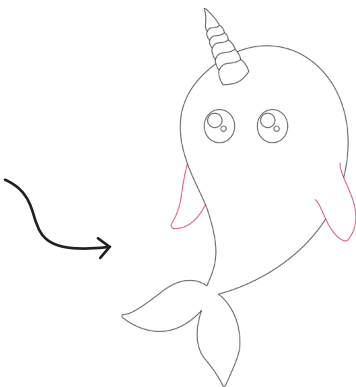

Step 1: Draw a swirly, upside down U-shape, like a balloon. This will be the body, so make it as big as you'd like your narwhal to be.

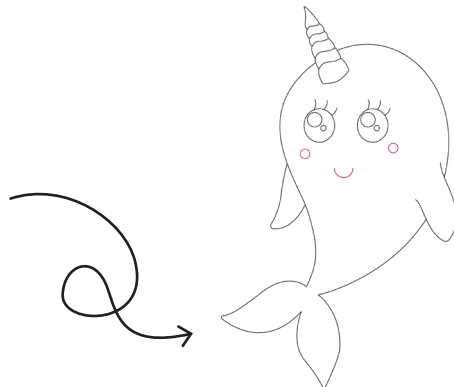

Step 2: Add two oval, leaf-shapes at the bottom of your balloon to make a tail. Like the unicorn, add two large circles for the eyes. Draw two smaller circles inside the eyes for a cartoon-look. Or, try drawing the eyes closed by adding two curved lines with eyelashes underneath.

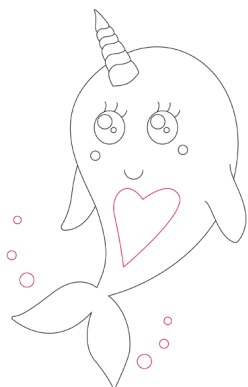

Step 3: Like the unicorn, add lots of smaller circles at the top of your balloon shape, one on top of the other. Then add a pointy top to make the narwhal's tooth.

Step 4: Now for the flippers. Draw two triangle shapes on either side of the body. Make sure the lines are a little curved to match the tail.

Step 5: Now add the narwhal's smile and cute cheeks. Draw a curved line underneath the eyes to make a smiley mouth. Then add two oval circles either side.

Step 6: And now you have your narwhal! Feel free to add extra things to the body if you like, such as a heart-shaped tummy or eyelashes to the eyes. You could even add water bubbles around the outside of the narwhal to show that it's swimming. Don't forget to colour it in!
