

DRAW YOUR OWN ALIEN!

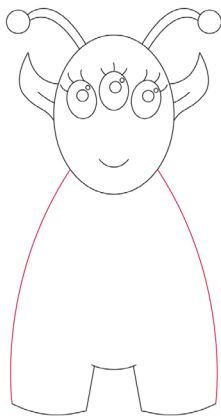

Step 1: To start your alien, draw an oval shape, like an egg, for the head. Add three circles inside the oval for the eyes and draw smaller circles inside these for a cartoon-look – like we did with the unicorn and narwhal.

Step 2: For the ears, draw two triangle shapes either side of the head and add a line inside for the detail. You can add antenna for your alien if you like, by drawing two sets of curved lines on top of the head with circles at the ends. Don't forget to draw a curved line for the mouth.

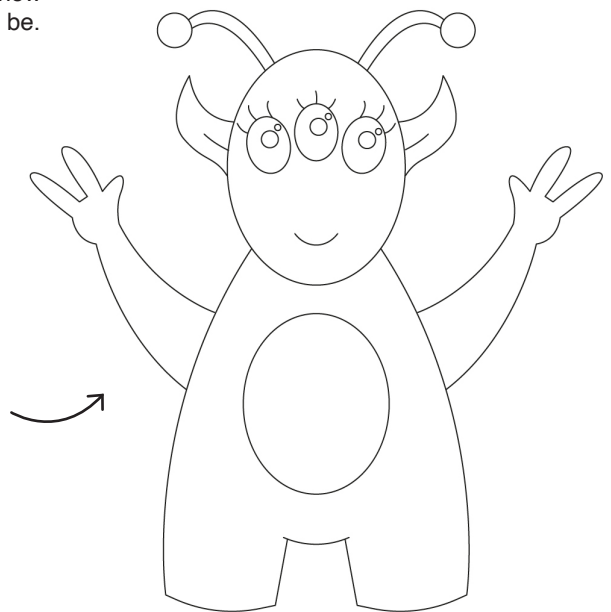

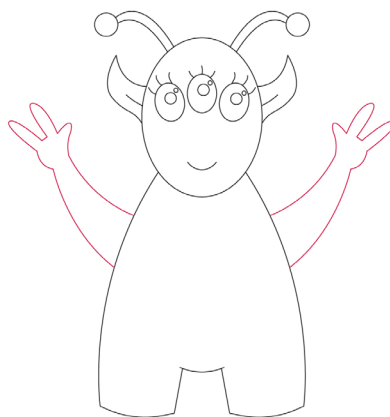

Step 3: To add legs, draw two curved lines underneath the head. Draw two vertical lines in the middle and connect them at the top with a slightly curved horizontal line.

Step 4: Now to add the alien's body. Draw two curved lines to connect the outside of the legs to the head – you can make them straighter or more curved depending on how wide you'd like your alien to be.

Step 5: Draw an arm for your alien by adding two curved lines on one side of the body. Join them up with long u-shapes for the fingers and a shorter one for the thumb. Repeat this on the opposite side of the alien's body to add the other arm.

Step 6: And now you have your alien! Feel free to add extra details if you like, such as an oval-shaped tummy or eyelashes to the eyes. Don't forget to colour your alien in!
